

NECC–Clinic Dubai

The NECC Clinic–Dubai provides session-based direct ABA and speech services in the Dubai Health Care City.

Following an Intake Assessment (IA) the NECC-Clinic supervisory team will set forth recommendations for the number of hours of applied behaviour analysis (ABA) therapy and/or Speech and Language (SLP) therapy per week, the number of hours of Board Certified Behavior Analyst (BCBA) supervision required for successful program development, and the location(s) of where the client’s ABA sessions would be most beneficial.

FEES

1000AED
(+VAT)

» ABA Intake Assessments

1400AED
(+VAT)

» ABA plus SLP Intake Assessments

The Intake Assessment process involves a comprehensive needs assessment, meetings with parents/caregivers, full report and recommendation meeting, as conducted by a BCBA (and SLP where necessary).

OVERVIEW OF SERVICES

Clinic-Based

Clients attend the NECC-Clinic for the recommended number of treatment hours per week. Each ABA program is developed by a supervising BCBA and implemented by a team of fully trained and supervised Registered Behavior Technicians (RBTs), who are qualified behaviour therapists. Speech and language goals are developed and overseen by a certified SLP, with behaviour therapists trained on program implementation in order to successfully embed SLP targets across weekly ABA sessions (where applicable). Quarterly progress report meetings, parent/caregiver training, and any scheduled observations will take place at the NECC-Clinic.

Home-Based

Clients receive the recommended number of treatment hours per week in their own home. The home-based program is set by the supervising BCBA, as implemented by a team of fully trained and supervised RBTs. Quarterly progress report meetings are held at the NECC-Clinic, however, parent/caregiver training and any scheduled observations will take place at home during scheduled session times.

School-Based

Clients receive their recommended number of treatment hours per week in their current educational placement. The school-based program is set by the supervising BCBA alongside the client’s educational team and implemented by a school or parent assigned shadow/support teacher where applicable. Session-based ABA hours as provided by NECC RBTs are also available. The supervising BCBA may provide support and guidance directly to the school staff when applicable and alongside, or in the absence of a shadow teacher. Quarterly progress report meetings and/or planned observations may take place at either the NECC-Clinic or at the school.
